ABOUT ME

MSc student in Design and Test for Integrated Circuits at Chemnitz University of Technology, with over two years as a Hardware Design Engineer advancing automotive power electronics. Expert in MOSFET testing (up to 1200 V), simulation (LTspice), and test bench development, with proven success in gate driver design and AQG-324 reliability testing (HTRB, HTGB, H3TRB). Skilled in LabVIEW programming and team collaboration, eager to optimize transistor design and process integration.

WORK EXPERIENCE

Infineon Technologies Dresden, Germany

Internship

01/02/2026 - 30/09/2026

Automated Relay Test Bench for Probe Card Applications

- Owned end-to-end development of an automated test bench supporting 50+ relay variants.
- Designed schematics and PCBs (KiCad) for signal conditioning and switching.
- Built LabVIEW automation for measurement sequencing and data acquisition.
- Developed Arduino firmware for relay control and timing.
- Automated instrument control (oscilloscope, power supply) via Python/SCPI.
- Designed probing fixtures and enclosures in Fusion 360.

Infineon Technologies Dresden, Germany

Working Student-wafer Testing

01/09/2025 - Current

- **Wafer Testing**: Conducted probe-card testing for 200 mm and 300 mm wafers.
- **Automation Development**: Built fully automated relay-characterization system using LabVIEW; implemented LabVIEW-based measurement and control programming.
- **Tools & Scripting**: Experienced in Arduino development, Python scripting, and PCB design.

Technische Universität Chemnitz Chemnitz, Germany

University research assistant

08/01/2025 - Current

- **Gate Stress & Leakage Analysis**: Performed Dynamic Gate Stress (DGS) analysis in power semiconductors; investigated gate leakage mechanisms and effects in high-voltage devices.
- **Reliability Testing**: Conducted High-Temperature Reverse Bias (HTRB) testing for device reliability.
- **Detection System Development**: Built gate-leakage detection system for 2 kV-rated semiconductors.
- **Measurement Automation**: Automated procedures using LabVIEW for efficient data collection.

Chemnitz Power Labs Chemnitz, Germany

Hardware developer-Working Student-Power Electronics

12/02/2024 - 30/06/2025

- **Semiconductor Parameter Expertise**: Skilled in measuring gate threshold (V_{th}), gate leakage (IGSS), drain-source leakage (IDSS), body diode (VSD), and RDson; proficient in high-voltage measurements up to 1200 V.
- **PCB Design and Simulation**: Experienced in KiCAD for designing adapters and gate drivers; utilized LTspice for project simulations.
- **Gate Driver Development**: Analyzed response under various conditions; contributed to development, testing, calibration, and custom HV Zilla tool for gate leakage measurement.
- **Programming and Instrumentation**: Programmed in LabVIEW; knowledgeable in test equipment including power supplies, multimeters, oscilloscopes, and Keysight curve tracers.
- **Reliability and Test Bench Operations**: Supported reliability tests (load cycle, HTRB, HTGB, H3TRB, etc.); executed test bench tasks including power cycling.
- **Documentation and Collaboration**: Proficient in Excel for data logging/analysis, PowerPoint for presentations, Microsoft Teams for collaboration, and Planner for task management across projects.

RIOD LOGIC Cochin,kerala, India

Business or sector Information and communication | **Website:** <https://riod.in/>

Hardware Design- Engineer

12/06/2021 - 10/09/2023

- **Design and Simulation Tools:** Extensive knowledge of Altium Designer, LT PSpice, and similar; proficient in multi-layer (up to 4-layer) schematic and PCB layout design.
- **Debugging and Instrumentation:** Experienced with debugging tools including IDEs and emulators; skilled in test instruments such as multimeters, logic analyzers, and digital storage oscilloscopes (DSO).
- **Power Supply Design:** Expertise in DC/DC converters, LDOs, and battery-operated product design.
- **Testing and Bring-Up:** Proficient in board bring-up, interface testing, and overall test/debugging processes.
- **Programming Languages:** Learned Python, C, and C++ for embedded and general applications.

● **Estrrado Technologies** Trivandrum, Kerala, India

Technical support engineer

25/05/2020 - 08/08/2021

- Overall support for the customers by phone and emails
- SQL server operations

● **Livewire India(CADD centere) Thrissur. Kerala** thrissur, India

Technical support engineer-Automation

08/02/2019 - 01/03/2020

- IoT communication and protocol
- cloud and client devices(MQTT)
- Data Analysis

● **RemoMech Engineering** pune, India

Engineer in electrical systems

17/05/2017 - 10/02/2019

- Operation of 4MW(4000KW,11KV,5360 Hp,375 Rpm), synchronous, motor(WEG) through DCS(distributed control system)by SIEMENS sierug power SPPA T-1000

EDUCATION & TRAINING

● **01/10/2023 - CURRENT** chemnitz, Germany

● **MSc. Design and Test for Integrated Circuits** Technische Universität (TU) Chemnitz

•

Address: Technische Universität Chemnitz, Straße der Nationen 62D-09111, chemnitz (Germany) | **Website:** <https://www.tu-chemnitz.de/> **Field(s) of study:** Design and Test for Integrated Circuits | **Number of credits:** 34

● **15/05/2012 - 30/06/2016** thrissur, India

● **Bachelor of Technology, Electrical and Electronics** sahrdaya collage of engineering

Address: Kodakara, P.B.No.17, Thrissur (Dt), Pin 680684, Kerala State, India680684, thrissur (India) | **Website:** <https://www.sahrdaya.ac.in/> **Field(s) of study:** Electrical Engineering
